Update on Design Code

Alec Scragg from AR Urbanism has contacted us and submitted his draft programme for the production of the Design Code.

AC managed to get in contact with Troy Planning last week, and they sent over their updated baseline and character assessment to him. He explained that it was difficult for him to prepare a programme before seeing this work as the character assessments in particular are very relevant to the preparation of design guidance.

AC has sketched out a provisional programme which he has circulated to the Committee that shows work stages which are relevant, and is reflective of the initial deadline for the work to be completed given by Locality as the end of November.

AC shared with us two links to design guides produced for villages in South Cambridgeshire. These give a good indication on what a design guide can do in a similar context to Over Hulton and should give a good idea as to the type of content that one can include in a design guide. Can the Committee please review and come back with any feedback.
